Acknowledgment

I Would Like To Express My Sincere Gratitude To All Those Who Have Supported Me Throughout The Development Of This Online Lawyer Appointments Project.

First And Foremost, I Am Deeply Thankful To Our Project Guide **Dr Bhavesh Patel And Viral Vyas** For Their Valuable Guidance, Encouragement, And Continuous Support During This Project. Their Insights And Expertise Were Instrumental In Shaping This System.

I Would Also Like To Extend My Appreciation To My Institution, For Providing Me With The Necessary Resources And Environment To Work On This Project.

Finally, I Am Grateful To Various Online Communities, Forums, And Resources That Provided Me With Knowledge And Technical Help When Needed.

This Project Has Been A Great Learning Experience, And It Has Given Me Deeper Insights Into Real-World Web Development, Database Management, And The Healthcare Industry's Growing Need For Digital Solutions.

Thank You All!

With Sincere Regards

Feny Panchal(107)

CHAPTER 1: - INTRODUCTION

1.1 PROJECT PROFILE

Project Title	Online Lawyer Appointments
Objective	The Purpose of Website is to provide the Client a Facility To find the Lawyer according to his/her Problems and Get online Appointments.
Front End Tools	Html, CSS, JavaScript
Back End Tools	PHP, MySQL
Designing Software	VSCode
Documentation Tools	Microsoft Word, Microsoft PowerPoint
Project Duration	50 Days
Team Members	1
Developed by	Feny Panchal
Summited To	DCS, HNGU University, Patan
Project Guide	Viral Vyas , Bhavesh Patel

1.2 Project Definition

1.2.1 Online Lawyer Appointments is a platform that connects clients with the right lawyer based on their specific legal needs. It helps users easily find legal professionals tailored to their unique problems, ensuring a more efficient and effective resolution.

1.2.2 Online Lawyer Appointments is a web-based platform that simplifies the process of finding the right legal expertise. Clients can easily input their legal issues, and the system matches them with qualified lawyers specializing in the relevant field of law. The platform provides comprehensive lawyer profiles, user ratings, and the option to schedule consultations directly through the website. With its easy-to-navigate interface, LawyerTo ensures clients can quickly connect with legal professionals who are best suited to address their specific legal challenges. This service bridges the gap between legal expertise and client needs, making the search for the right lawyer more efficient and accessible.

CHAPTER 2: - SYSTEM ANALYSIS

2.1 HARDWARE CONFIGURATION

Server Side:-

Processor	Intel i5 & higher
RAM	8 Gb & higher
Hard Disk	512 Gb & higher

Client Side: -

Processor	Intel i5 & higher
RAM	4 Gb & higher
Hard Disk	265 Gb & higher

SOFTWARE CONFIGURATION

Server Side: -

Operating System	Windows 11
Application Server	Wamp
DATABASE	MySQL
Editor	Visual Studio Code & Notepad++

Client Side: -

Internet	Internet must be Required
Browser	Any Web Browser (Ex. Google Chrome, Firefox, etc)

2.2 REQUIREMENT ANALYSIS

The step in developing the system is analysing the problem. Before developing a system, the problem should be well defined. Identifying the need for a new information system and launching an investigation and a feasible study must be done to check whether the software is visible for the organization. This unit we have done this study.

Lack of security is another problem of the existing system. That may lead to serious problems.

It will affect the business career. In the existing system, there is no facility for the user to see the data. The existing system is not reliable because of human errors.

Because of the above reasons the existing system need to be change, for the easy and smooth running of the system

2.3 Existing System

The existing system for finding a lawyer typically involves a time-consuming and often confusing process, where individuals rely on referrals, word-of-mouth, or browsing through directories without a clear understanding of which lawyer is best suited for their specific legal issue. This can lead to delays in finding the right representation, mismatched expertise, or dissatisfaction with the legal services provided.

- Inquiry: In Existing System, we need to find lawyer manually or through colleague.
- Manual: We need to keep record of each lawyer manually.
- Paper Based: Everything is paper based so It is time consuming.

2.4 Need for new system (Scope of System)

The Online Lawyer Appointments application addresses these challenges by offering a streamlined, efficient, and user-friendly platform to quickly match clients with lawyers who specialize in their particular legal concerns. Unlike traditional methods, Online Lawyer Appointments provides detailed lawyer profiles, client reviews, and easy communication channels, helping individuals make informed decisions in a fraction of the time. This modern approach reduces the stress of finding legal help and ensures better outcomes for clients by connecting them with the right expert for their needs.

2.5 System Modules

In This System Include in Three Systems.

(1). Customer (2). Lawyer (3). Admin

3.1 Data Flow Diagram

3.1.1 Context level DFD

3.1.2 1st level DFD for User

3.1.3 1st level DFD for Admin

3.1.4 1st level DFD for Lawyer

3.1.5 2nd level DFD for User

3.1.6 2nd level DFD for Lawver

3.2 Data Dictionary

1. User (Customer) Table: -

Sr.No	Field	Data Type	Size	Constraint	Description
1	Id	Int	10	Primary Key	Unique Id of User
2	Username	Varchar	50	Not Null	Name Of User
3	Email	Varchar	50	Not Null	Email Id Of User
4	Password	Varchar	100	Not Null	Password Of User
5	Created_at	Timestamp		Not Null	Date Of Creation

2. Admin table: -

Sr.no	Field	Data type	Size	Constraint	Description
1	ID	Int	10	Primary Key	Unique Id of Admin
2	Name	Varchar	50	Not Null	Name Of Admin
3	Password	Varchar	100	Not Null	Password Of Admin

3. Lawyer table: -

Sr.no	Field	Data type	Size	Constraint	Description
1	ID	Int	10	Primary Key	Unique Id of Appointment
2	User_id	Int	50	Foreign Key	Reference Form User Table
3	Lawyer_id	Int	50	Foreign Key	Reference Form Lawyer Table
4	Date	Date		Not Null	Date of Appointment
5	Time_sloat	Time		Not Null	Time of Appointment
6	Status	Text	100	Not Null	Status of Appointment
7	Payment_Status	Text	100	Not Null	Staus of Payment
8	Payment_Method	Varchar	50	Not Null	Method of Payment

4. Appoitment table: -

Sr.no	Field	Data type	Size	Constraint	Description
1	ID	Int	10	Primary Key	Unique Id of Appointment
2	User_id	Int	50	Foreign Key	Reference Form User Table
3	Lawyer_id	Int	50	Foreign Key	Reference Form Lawyer Table
4	Date	Date		Not Null	Date of Appointment
5	Time_sloat	Time		Not Null	Time of Appointment
6	Status	Text	100	Not Null	Status of Appointment
7	Payment_Status	Text	100	Not Null	Staus of Payment
8	Payment_Method	Varchar	50	Not Null	Method of Payment
1	ID	Int	10	Primary Key	Unique Id of Appointment

5. Category table: -

Sr.no	Field	Data type	Size	Constraint	Description
1	Id	Int	10	Primary key	Unique id of category
2	Name	Varchar	50	Not null	Name of category

Chapter 4:- Interface Design

4.1 :- Screenshots

4.1.1 User Modules

1) Registration Page: -

The screenshot displays a web browser window with a single tab titled 'User Registration'. The address bar shows the URL 'testing.local:8080/appointment/register.php'. The main content area features a registration form with the heading 'Create an Account'. The form includes input fields for 'Username', 'Email Address', 'Email', 'Mobile/Phone Number', and 'Password', each with a corresponding label. Below these fields is a 'Register' button. At the bottom of the form, there is a link that reads 'Already have an account? Login Here'. The browser's taskbar at the bottom shows the Windows Start button, a search bar, and several application icons. The system clock in the bottom right corner indicates the time is 13:34 on 07-08-2024.

Chapter 5:- Conclusion & Future Work

Conclusion

The Online Lawyer Appointment System provides an efficient, user-friendly platform that bridges the gap between legal professionals and clients. By enabling users to search for lawyers by category, view profiles, check availability, and book appointments online, the system streamlines the consultation process and eliminates traditional scheduling barriers. For lawyers, it offers tools to manage appointments and view case details, enhancing their productivity and client communication.

Overall, this system reduces administrative overhead, improves appointment transparency, and delivers a seamless experience for both users and lawyers. It represents a significant step toward the digital transformation of legal services.

Future Work

Document Upload Feature: Allow users to upload legal documents for lawyers to review prior to appointments, enhancing preparedness and efficiency.

Mobile Application: Develop dedicated Android and iOS apps to increase usability and accessibility on mobile devices.

Rating and Review System: Let users rate lawyers and write reviews to help others choose the right legal expert.

Multilingual Support: Implement support for multiple languages to cater to a broader audience.

Advanced Analytics: Provide reporting tools for lawyers and admins to track appointment history, peak hours, and user engagement.
